

# Crane operator cutter suction dredgers/multicat & Visual inspection hoisting tools

Safety and efficiency are of ultimate importance when moving loads. During this course, crane operators responsible for operating cranes on board working vessels, cutter suction dredgers and multcats learn to issue instructions and to carry out lifting work independently. Assessment of the use of lifting equipment is another important aspect of the course.

## Content

- types and models of cranes
- lifting plans
- safety aspects
- lifting equipment
- working load, test load, breaking strength and use factor
- lifting equipment certificates
- standards for rejection
- estimation of load masses
- safe rigging of loads
- the use of walkie-talkies, hand and arm signals
- daily maintenance
- basic know-how of diesel engines, hydraulics and electro-technology

## Result

The course concludes with a practical assessment. If the practical assessment is assessed positively, you will receive a certificate.

## For whom?

For crane operators who perform lifting work on work ships, cutter suction dredgers and multcats.

## Requirements

None.

## Duration

2 days.

## Price per participant On Request

On request.

Price is for course year 2020-2021.  
Prices are excl VAT
