

Terminal tractor driver - elementary and refresher

The driver of a terminal tractor has the responsibility to load and unload railway wagons and ships. Furthermore, he drives and handles the terminal tractor and transports cargo (goods and containers) to and from the terminal or the transshipment location. Moreover, the terminal tractor driver is aware of the fact in which order containers should be moved into a stack, ship or railway wagon as safely as possible without causing any damage. It is important that drivers are able to meet the high requirements in order to work safely and responsibly. Therefore, terminal tractor drivers are able to work according to the latest safety regulations regarding the working conditions act. Furthermore, a driver is well educated and should have decently instructions. The participant will receive a certificate if he completed the practical assessment successfully.
