Crane Operator Offshore installations / refresher

A crane operator moves loads to and from supply boats at offshore installations. He must be able to clearly communicate with his colleagues from a great height. The crane operator is familiar with the safety aspects of lifting equipment and the rigging of loads. He is also involved in the daily maintenance of the offshore installation. All these aspects are dealt with during the Offshore Crane operator course. The competences of the crane operator are kept up-to-date in the offshore installations Crane operator (refresher) course.

The training course Crane operator offshore installation (1.2) is registered by NOGEPA. Our training course Crane operator offshore installations (1.2) is given conform OPITO and OMHEC guidelines are accredited by NOGEPA.

Content

Theory

- knowledge of various cranes and their applications; thorough knowledge of materials and equipment used for performing hoisting activities, perceiving wear and tear, performance of daily maintenance and inspection of those materials and equipment;
- thorough knowledge of operation and daily maintenance of engines and apparatus used on cranes;
- knowledge of physics, mechanics, electrics and hydraulics;
- knowledge of calculation of weights of loads and the ability to apply load radius diagrams;
- knowledge of standards and regulations related to the job;
- knowledge of procedures applicable to transportation of persons by means of a crane.

Practice

- application of standard hand and arm signals;
- moving loads, different in type and weight in at least two or more concurrent crane movements;
- recognize electrical, hydraulic and/or mechanical defects and faults;
- safety inspections of cranes and their support;
- crane maintenance;
- attaching loads)
- moving loads horizontally;
- placing and following loads on a moving platform;
- applying safety precautions during all mentioned activities;
- keeping a crane book up-to-date.

Results

To qualify for the refresher training the employee must make every year at least 10 hours with the crane. These

For whom?

Persons crane experience, trained according to the NOGEPA standards, assigned to operate a crane on an offshore installation.

Requirements

- the delegate may also be in the possession of a valid registration in his Personal Safety Logbook of the: "Entry course Crane Operator Offshore (1.10)"

Duration

2 days

Price per participant

€ 1499.00

Price is for course year 2020-2021.
Prices are excl VAT
